

Environmental Policy

PNR Construction Ltd takes their responsibilities toward the environment seriously and is committed to **“Protecting today’s Environment for Tomorrows Needs”**.

At all stages of our operations relating to the provision of civil engineering and building contracts, we will:-

- (a) Comply with all applicable laws and regulations
- (b) Seek to continually improve the effects our activities have on the environment.
- (c) Identify any environmental effects of our activities and either eliminate, reduce or control them.
- (d) Reduce, re-use and re-cycle waste where possible
- (e) Seek to minimise the consumption of resources and in particular reduce the consumption of hazardous materials.
- (f) Monitor our environmental performance on a regular basis
- (g) Monitor and reduce where practicable, all waste, air and noise emissions and water discharges.
- (h) Control the use of all hazardous materials.
- (i) Make our policy available to all stakeholders.
- (j) Train our staff in environmental issues as required, and with regard to the environmental effects of their activities.
- (k) Encourage our customers and suppliers to improve their environmental performance related to the use and supply of products and services.

This policy will be made available to the public and is implemented through a formal environmental management system, which is periodically audited and reviewed in order to ensure its continuing suitability and effectiveness.

Responsibility for the successful implementation of this policy rests with M.Treanor. However, all staff are required to follow those parts of the Environmental Management System which are applicable to them. Staff will be provided with the appropriate training in order to carry out their tasks effectively and efficiently.

This policy has been agreed by the top management of PNR Construction Ltd and is issued on my Authority
